

**Samsonite Assures Consumers About the Safety of its Products**

**HONG KONG, June 15, 2012** – Samsonite International S.A. today gave every assurance to consumers that the Company’s *Tokyo Chic*, *Cubelite* and *Westlake* luggage, referenced by the Hong Kong Consumer Council this morning, are completely safe.

“Product quality and safety have always been Samsonite’s primary focus. As soon as the Consumer Council in Hong Kong contacted us about the level of PAH in the side carrying handles of our luggage, we sent samples to an independent laboratory for testing. Based on the independent test results as well as on specialist expert opinion, we are absolutely confident that consumers can continue to use our luggage without any safety or health concerns at all. We do not anticipate this incident having any material impact on our results whatsoever,” commented Ramesh Tainwala, President, Asia-Pacific & Middle East.
